

Hirtika Dharma

9016288070 — dharmahirtika@gmail.com
in/hirtika-dharma

Objective

Detail-oriented Computer Science graduate with strong analytical and problem-solving skills, passionate about learning new technologies and building practical solutions. Proficient in SQL, programming fundamentals, and UI/UX design, with hands-on experience as an AI Design Intern involving AI tools and web-based interfaces. A collaborative and adaptable individual committed to delivering efficient, accurate, and user-focused solutions in professional environments.

Skills

Programming & Tools: SQL, Python, Prompt Engineering, Git, Excel, Power BI

Design: Figma, Wireframing, Prototyping, UX Research

Soft skills: Teamwork, Adaptable, Time management

Education

B.E. in Computer Science and Engineering

SIES Graduate school of technology, Mumbai university

2022–2026

CGPA: 8.43 / 10

HSC

Ryan international school, Surat

2020–2022

Percentage: 87%

Internships

E2M Solutions Pvt Ltd — AI Intern (Design)

March 2026 – May 2026

Design user interfaces using Figma with a focus on usability, consistency, and accessibility. Utilize AI tools such as Gemini, Google AI Studio, Claude, Cursor, and Antigravity to generate design components and optimize workflows through effective prompt creation. Evaluate AI-generated outputs to identify usability issues and refine designs, ensuring intuitive navigation and a seamless user experience. Conduct detailed UI reviews to enhance overall interface quality and user interaction.

Projects

- **Amazon Review Scraper :**

Full-stack Amazon review scraper built using Python, Playwright, FastAPI, and React, with leadership of the end-to-end development process. Extracted 1,000+ reviews per product through a custom pagination strategy, while implementing real-time progress tracking, interruption recovery, CAPTCHA-aware handling, and session persistence. Enabled structured exports to CSV and Excel for downstream analysis.

- **ML based Malware detection system :**

Team Size: 3

Machine learning-based malware detection system for classifying files as benign or malicious using static analysis, with leadership of feature engineering, model training, and evaluation efforts. Assessed multiple classifiers using accuracy, precision, recall, and F1-score, and built automated pipelines for data processing, model training, and offline malware detection.

- **Knowledge Base AI Assistant :**

Team Size: 2

Built an AI-powered assistant using Python, LangGraph, LangChain, RAG, ChromaDB, and LLMs. Led the implementation of information retrieval pipelines and automated email workflows with SMTP integration. Optimized ChromaDB knowledge bases to improve response relevance and system performance, delivering context-aware responses through a RAG-based architecture.

- **Splitter - an expense splitting app :**

Skills: Figma

I designed this app to simplify how people split and settle shared expenses. This project focuses only on the UI/UX design aspect. Splitter makes the process quick and effortless with features like real-time receipt scanning and seamless UPI payment integration.

Certifications

- Claude Skills Certifications, Anthropic
- Google Cybersecurity Certificate, Coursera
- Google AI Essentials Certificate, Coursera

Roles of Responsibility

- Coordinator in Training and Placement team of SIES GST (2025).
- Volunteered in IEEE team event Inquisitive (2024)
- Volunteered in Publicity team of SIES GST (2024)
